

OrderConnect™...

The Next Generation of Order Management Systems
Simple, Accurate & Time Saving

Scan

Order

Receive

With OrderConnect™ through Source Medical you can select the medical supplies you need and place your order in less than 10 minutes!

- 1- Scan the bar codes created specifically for the products you want to order.
- 2- Plug in your bar code scanner and your shopping cart is immediately filled with the exact product, quantity and unit of measure you want.
- 3- Source Medical delivers your order.

OrderConnect™ is fast, flexible and accurate

Working with you, the Source Medical sales and support team creates a special “custom catalogue” of product bar codes based on your purchase history and preferences. These bar codes can be used as shelf or drawer labels, or as scannable sheets, with the products in the sequence that you prefer (by category, department, location, etc.). When your needs change, you have the option of customizing your list by simply adding or deleting products.

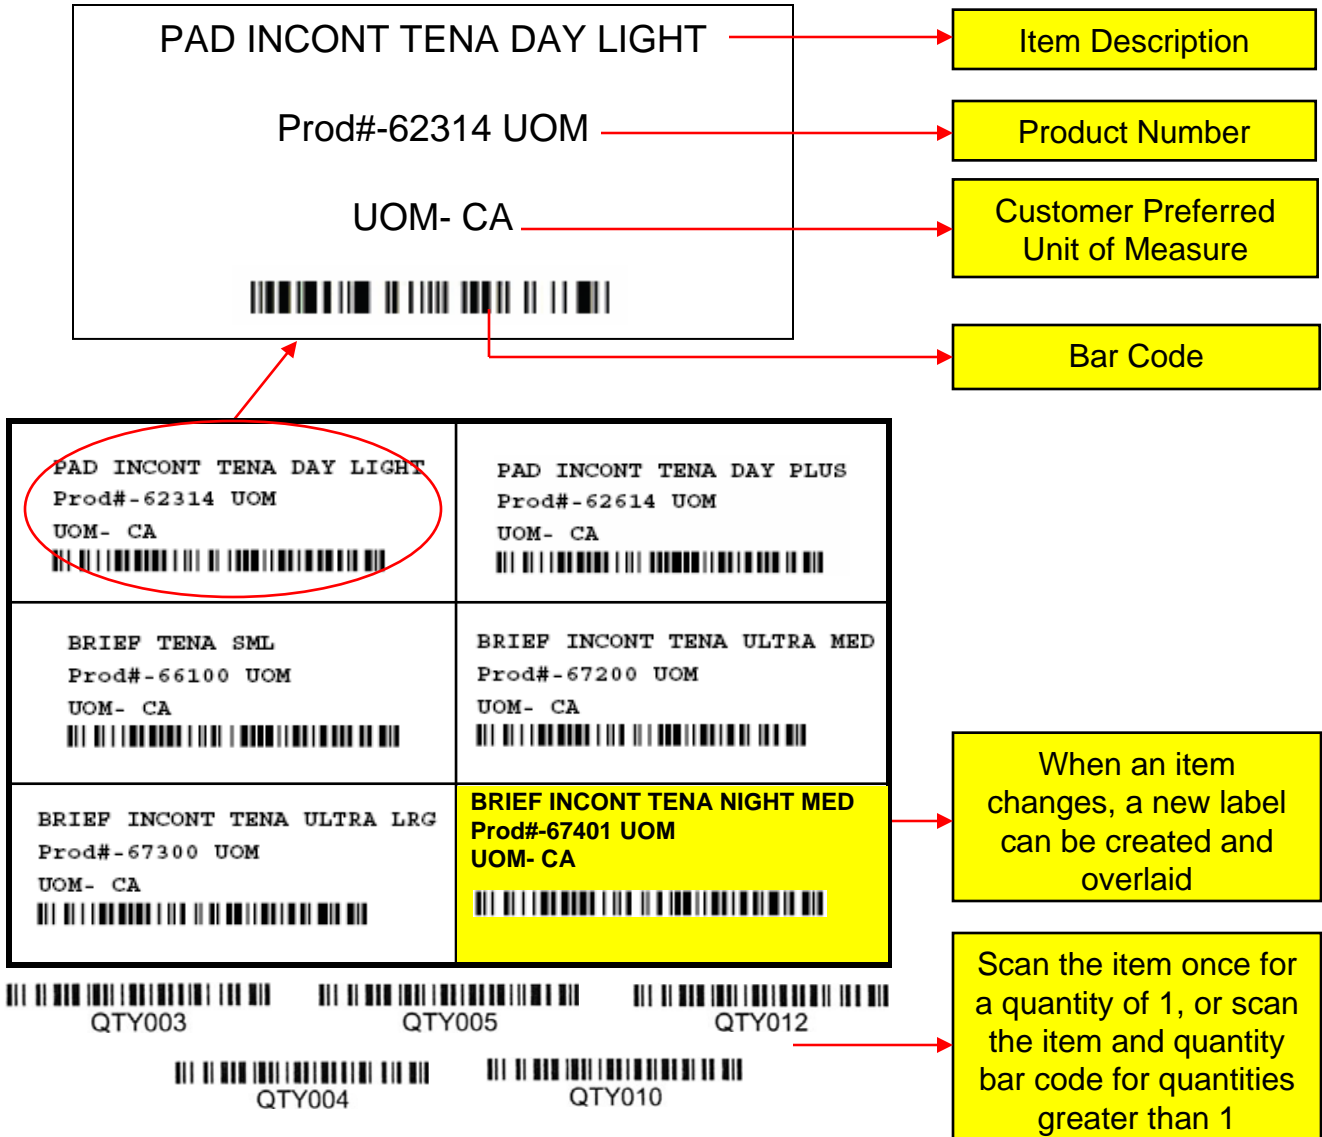

Your Mini-scanner does the work

We provide you with a personal, key ring size scanner along with software that takes only three minutes to install. OrderConnect™ allows you to scan your bar codes, upload to our website and transmit your entire order within minutes. You then get an order confirmation...instantly.

Your Benefits

- Improved ordering and inventory processes
- Reduced ordering time
- Reduced order entry errors and unnecessary returns
